DETAILED ACTION

Claim Objections

Claim 10 is objected to because of the following informalities: The dependency of claim 10 is incorrect. The claim should depend from claim 9. Appropriate correction is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-3, and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 1,069,356.

This reference teaches detergents containing anionic and cationic surfactants, an example of which comprises 16% lauryltriglycol ether sulfosuccinate, 1% alkyldimethylbenzylammonium saccharinate, 4% lauric diethanolamide, and 77% water (page 3, lines 25-30). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

Application/Control Number: 10/524,085

Art Unit: 1751

3. Claims 1-3 and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Delaney, GB 2,340,843.

Delaney teaches laundry detergents containing 2 to 20 parts anionic surfactant, 1 to 25 parts alkyldimethylbenzylammonium methosulfate germicidal cationic surfactant, 2 to 40 parts nonionic surfactant, and the balance water (page 40, claims 2 and 11). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

4. Claims 1-5 and 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Fogel et al, US 4,001,394.

Fogel et al teach a shampoo containing a quaternary ammonium saccharinate (see abstract). An example of such a composition comprises 44% of a mixture of anionic, nonionic, and betaine surfactants, 1.3% citric acid, 2% ethanol, 0.4% stearyldimethylbenzylammonium saccharinate, and the balance water (col. 4, example II). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

5. Claims 1, 3-5, and 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Katsumi et al, US 3,553,141.

Katsumi et al teach a sterilizing detergent composition (see abstract). An example of such a composition comprises 2% tetradecyldimethylbenzylammonium saccharinate, 11% anionic surfactants, 20% ethanol, and the balance water (col. 5,

Art Unit: 1751

example 2). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

6. Claims 1, 5, 8, and 11 are rejected under 35 U.S.C. 102(a) as being anticipated by Wigley et al, US 6,358,900.

Wigley et al teach a hard surface cleaner (see abstract). An example of such a composition comprises 0.205% PEG-5 cocomonium methosulphate, 0.1% anionic surfactant, and the balance water (col. 3, example 1). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

7. Claims 1-4, 8, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by von Mallick, US 5,888,489.

von Mallick teaches a conditioning shampoo (see abstract). An example of such a composition comprises 1% dipalmitoleyl ethyl hydroxyethylammonium methyl sulfate, a mixture of anionic, nonionic, and amphoteric surfactants, and the balance water (col. 9, claims 1 and 3). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

8. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Guskey, US 5,977,036.

Guskey teaches a styling shampoo (see abstract). An example of such a composition comprises 1% ditallowamidoethyl hydroxypropylammonium methosulfate,

Art Unit: 1751

18.6% of a mixture of anionic, nonionic, and amphoteric surfactants, 1% citric acid, 0.42% cetyl alcohol, 0.3% polymers, and the balance water (col. 9, claims 1 and 3). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

9. Claims 1, 2, 5, 7, 8, 10, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Hagner et al, US 4,113,630.

Hagner et al teach a substrate for treating fabrics (see abstract). An example of such a composition comprises 1.1% ditallowdimethylammonium methosulfate, 22.7% of a mixture of anionic and nonionic surfactant, and the balance water (col. 19, example III). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles I. Boyer whose telephone number is 571 272 1311. The examiner can normally be reached on M-F 9:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta can be reached on 571 272 1316. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
